SELECTED PROJECTS

VextaCore | Quantitative Sports Analytics Platform

Next.js · TypeScript · PostgreSQL · Python · Stripe

- Built a sports analytics platform that compares independently estimated probabilities with market odds to surface model/market divergence.
- Automated data ingestion and signal scans; persisted evaluation history and delivered Telegram notifications.
- Implemented authentication, subscription access, Stripe Checkout, and webhook-based payment verification.

Unpause | Developer Decision-Memory Web Application

React · TypeScript · Go (Gin) · PostgreSQL · Docker

- Developed a React frontend and Go REST API supporting projects, issues, decision records, and immutable scope versions.
- Implemented database-backed sessions, per-user data isolation, and resume-context workflows with next actions.
- Containerized the frontend and API; deployed to Render with Neon PostgreSQL and resolved a session reliability issue.

Panstr | Decentralized Forum Application

React · TypeScript · Nostr

- Created a Nostr-based forum with browser-extension login (NIP-07), posts, and category-specific feeds.
- Fixed cross-category feed behavior using event tags and filtering logic.

PROFESSIONAL EXPERIENCE

Sunnysideup Studio | WordPress Developer | 2023–Present

- Build and maintain responsive WordPress websites with Elementor, Gutenberg, and Breakdance.
- Implement custom PHP/JavaScript functionality using ACF and WooCommerce integrations.
- Investigate and resolve production issues, CSS/DOM conflicts, data migrations, and performance/SEO concerns.
